

Description Pai Gow Poker

Versions

1.0 First version

Abstract

This app just let you play Pai Gow Poker (also called Double-hand poker) which is an Americanized version of Pai Gow.

Play Instructions

To be able to bet you need to buy some chips, this is possible in the start screen then your current balance is low.

You can bet either \$1, \$5 or \$10 by pressing the corresponding marker.

In this version the bet cannot be changed, but the size of the bet is unimportant for the strategies.

You start the initial deal which gives you 7 cards faced up.

You should construct two (Poker) hands, one with 5 cards and one with 2 cards.

The 5-card hand must have higher rank than the 2-card hand.

The bank is forced to split his hands according to the house-way. The house-way used is the Trump Plaza.

If you win both hands, you win. If you win one hand and the bank wins the other the bet is repaid. Equal hands are considered a win for the bank.
